EXPERIENCE

2021 – now **Senior Solution Scientist** at Flyinstinct.

2020 – 2021 **Solution Scientist** at Flyinstinct.
A startup provides a digital platform for airport inspections developed with the most advanced technologies of computer vision and AI algorithm.

- Proof of concept: Design new algorithms based on computer vision technique. Implement them in Python, and prove their performance in our industrial products.
- Data analysis: Extract information from images, analyze them according to the requirement of the products, which helps to design better algorithms.
- Software team lead: explain and discuss daily tasks and distribute daily work. Provide the best direction to go for product development based on team members' ability.
- Pipeline performance evaluation : Study the performance of the entire pipeline. Design in-house experiment for evaluating potential problems or bugs.

2018 – 2020 **Post-doctoral Fellow** Sorbonne Université, Institut des Nanosciences de Paris.
Supervisor: Matteo Calandra

- Applied a machine-learning type approach (minimize the gradients of the energy using conjugate gradient or steepest descent algorithm) to compute physical concepts.

2016 – 2018 **Post-doctoral Fellow** Laboratoire des Solides Irradiés, École Polytechnique.
Supervisor: Lucia Reining

- Developed mathematical methods and implemented it in a software (in Python) for bleeding-edge numerical simulations, leading to several top-tier peer-reviewed publications. See details at https://github.com/mxz2013/CumuPy.
- Proposed and participated an bleeding-edge experiment to confirm my theoretical predictions, with collaborations with researchers from different domains, and different countries.
- Received 3 invitations for giving a seminar on my researching projects, and published one article which applies probability theory in physics.
- Organized ETSF correlation team meeting at École Polytechnique, France (+30 participants worldwide).

SKILLS

Languages English, Chinese, French.

Data science Programming & Database: Python, Wolfram Mathematica, Fortran, Bash, SQL.
Computer Vision: OpenCV.
Development & Maintenance: Git, SVN.
Editor: VI, Pycharm, Jupyter Notebook, LaTeX, Microsoft Office.
Math & Statistics: Machine learning, deep learning, quantitative research.

Soft skills Problem solver, passionate about data analysis, curious about new technology, story-telling (presentation), strong sense of responsibility (family and work), planing and organization.

EDUCATION

2013 – 2016 **Ph.D. in Theoretical Physics**, École Polytechnique, France.
Supervisor: Lucia Reining

- Led multiple joint projects producing several top-tier peer-reviewed publications;
- Developed mathematical methods beyond state of the art for the analysis of solids, implemented them into scientific computing software.
- Participated 10 international conferences with 7 oral presentations and 3 posters (with one best poster prize).
- Co-organized the 12th ETSF Young Researchers' Meeting in Paris, France (+70 participants worldwide).

2010 – 2012 **M.Sc. in Erasmus Mundus - Master of Molecular Nano- and Biophotonics for telecommunications and biotechnologies (MONABIPHOT)**, École Normale Supérieure de Cachan, France. **Titre avec la mention BIEN**.

- Won the Erasmus Mundus Scholarship (48K € for a two-year study in Europe).
- Acquired multidisciplinary knowledge on biology, chemistry, and physics.

2005 – 2009 **B.Sc. in Optoelectronic Engineering**, Harbin institute of technology, China. **GPA: 85/100 .**
